## IT CADRE AWARDED GSA IT SCHEDULE 70 CONTRACT

**STERLING, VA, November 13, 2006** -- IT Cadre announced today that it has been awarded a GSA (General Services Administration) IT Schedule 70 contract, allowing the company to sell its products and services to federal agencies at any of its domestic sites.

IT Cadre is a veteran owned, Northern Virginia engineering and business services company that specializes in services which save the government money by ensuring the best value at time of purchase, manage assets to eliminate waste and promote reuse, and ensuring the government only pays for actual products and services used.

“While we have been successful in working with the federal government and its major prime contractors, we are extremely excited about receiving this GSA contract. It represents an opportunity to tap into the more than \$30 billion Schedule market, which continues to grow,” says IT Cadre president Mark Madigan.

“Expanding our abilities to do business with government agencies has been a strategic goal of our company. We are confident that our ability to leverage our unique methodology in providing sound business solutions to current customers will go a long way in gaining future GSA Schedule business,” adds Madigan.

IT Cadre is headquartered in the Loudoun Tech Center at 45945 Center Oak Plaza, Suite 125, Sterling, VA, where it also houses its applications development and operations center.
