IT CADRE PRESIDENT NAMED TO JCOTS ADVISORY COMMITTEE

STERLING, VA, June 06 --The Joint Commission on Technology and Science (JCOTS) has appointed Mark Madigan, IT Cadre president, to an Advisory Committee, serving on the organization's Electronic Medical Records Committee.

JCOTS, created by the Virginia General Assembly as a permanent legislative commission, studies and promotes all aspects of technology and science in the state. Its advisory committees review and make recommendations on commission initiatives. The Electronic Medical Records Committee will be studying a number of key issues related to improving Virginia's health information technology.

In making the Advisory Committees' appointments in May, Delegate Joe T. May, chairman of JCOTS, noted that "the commission received an astounding number of resumes from highly qualified individuals for a limited number of spots, making the appointments process very difficult. We are excited about the contributions that these very talented and knowledgeable individuals will make to the work of JCOTS."

IT Cadre is a Virginia software engineering firm providing business solutions to healthcare providers. It specializes in Home Healthcare systems that streamline healthcare provider operations, giving them the electronic tools to improve patients outcomes and help reduce their operational costs.

IT Cadre is headquartered in the Loudoun Tech Center at 45945 Center Oak Plaza, Suite 125, Sterling, VA, where it also houses its applications development and operations center.
