IT CADRE CHIEF ENGINEER PRESENTS AT 2007 MEDICAL AUTOMATION INTERNATIONAL CONFERENCE

STERLING, VA, October 29, 2007 – The third Medical Automation International Conference was held at the National Conference Center in Lansdowne, Virginia. The conference theme, "Vital Signs: Saving Lives, Cutting Costs" presented innovative ideas, outstanding speakers, and cutting-edge demonstrations. Presentations were given on technologies that emphasize return on investment and improved patient outcomes. IT Cadre's Chief Engineer, Mike Morrisroe, presented the "*Value of Home Care Automation*".

Mr. Morrisroe highlighted the benefit of electronic medical records and a consolidated view of a patient's care record. "Better health information leads to better care" says, Mr. Morrisroe. "When doctors, home nurses, physical therapist, and other caregivers share information, it eliminates redundant record keeping that is costly and introduces errors". Mr. Morrisroe demonstrated the benefits of automation from Point of Care system through receipt of payment for care.

IT Cadre, a Virginia firm, provides business solutions and services to healthcare providers. Specializing in Home Healthcare systems and services that streamline healthcare provider operations, giving them the electronic tools to improve patient's outcomes and help reduce their operational costs.

IT Cadre is headquartered in the Loudoun Tech Center at 45945 Center Oak Plaza, Suite 125, Sterling, VA, where it also houses its applications development and operations center.
